## The Grade 100 Solution for Nonflexible Applications

Introducing the hook you can use with confidence for wire rope and other nonflexible applications ... the new Campbell Grade 100 Self-locking Swivel Hook. This hook features a flush-positioned trigger guard forged into the body and positive lock capability to greatly reduce the chance of unintentional opening. It has a rotating pivot pin for long life, and of course certified Grade 100 strength, making it the strongest, best quality swivel hook available today. Designed and made in the U.S.A.

- Fatigue tested to ASTM A952
- Meets the intent of OSHA regulation 1926.550(g)(4)(iv)(b)
- 100% proof tested with Certificate of Test included
- HOOK IS NOT DESIGNED TO SWIVEL UNDER LOAD

Release trigger is flush with body to help protect against damage or unintentional opening, yet is designed for easy operation, even with gloves

Rotating pivot pin... an industry exclusive

Completely replaceable trigger assembly

Bold, high profile lettering – including USA, Campbell brand, Size, Chain Grade, and Data Code

Teardrop hook design for maximum strength and snag prevention

Integrated forged latch with positive lock capability – closes automatically under load
